Quality and Testing Procedures

Phase I: Debug Process

- Entire control panel and enclosure tested for system integrity
- Multi-page documented testing results provided for each panel and enclosure

Phase II: Shipping and Final Inspection

- Entire panel and enclosure are assured to be 100% clean of all dirt, grease, wire strands, etc.
- Prints are included inside enclosure
- Final appearance inspection and packaging

How to Order

To discuss your application with us, please call your Galco sales representative who will review your current situation and obtain any measurements taken, motor nameplate data, line voltage, etc.

Certified to Build Control Panels to UL 508A Standards

Solid Performance Since 1986

For many years, Galco Industrial Electronics has been providing customers with high quality industrial control panels.

Companies like Ford Motor Company, General Motors, Lear Corp., Anderson Cook, and Standard Products have used Galco for their panel building needs.
