Features

HDMI Splitter Ideal for Digital Signage or Displaying Video in Schools or Trade Show Booths This complete transmitter and receiver system is recommended for home theaters and video presentations in conference rooms, schools, trade shows, meeting facilities, houses of worship, retail settings and other digital signage applications where the source and display are farther apart than conventional A/V cables allow. The B127-2A1-HH splits and extends a 4K video and stereo audio signal from an HDMI source device to two HDMI displays up to 125 feet (38.1 meters) away via user-supplied Cat6 cabling.

Built-In PoC Technology Provides Receiver Power to Avoid Bulky External Power Bricks Built-in Power over Cable (PoC) technology powers the low-profile receiver over Cat6 cable. Green and orange LEDs on both the transmitter and receiver will light up to indicate the system is receiving power and a signal is being transmitted. PoC lets you avoid the hassle of a bulky power brick and gives you the freedom to place the receiver away from an AC outlet.

Transmits Crystal-Clear 4K HDMI Video with Multi-Channel Audio and 4:4:4 Color The B127-2A1-HH supports Ultra HD video resolutions up to 4K x 2K (3840 x 2160) at 60 Hz with full, rich uncompressed DTS-HD, Dolby TrueHD and 7.1-channel digital audio. Built-in equalization automatically fine-tunes the image quality at the remote displays with no time-consuming manual fiddling needed. The splitter is capable of carrying HDR signals, which provide a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks. HDCP 2.2 compliance allows you to stream iTunes and Netflix content with no complications. This kit also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor.

Plug-and-Play Operation for Quick Setup and Immediate Use The included transmitter and receiver units work right out of the box with no software required. Mounting hardware is included for installing the units on walls, poles or 19-inch racks. Connect the transmitter to the source and the receiver to the displays with user-supplied HDMI cables (such as Tripp Lite's P568- or P569-Series). Then, connect the two units using Cat6 Ethernet cable (such as Tripp Lite N202-Series cable). Connect an optional display
